EVALUATION AND PLANNING

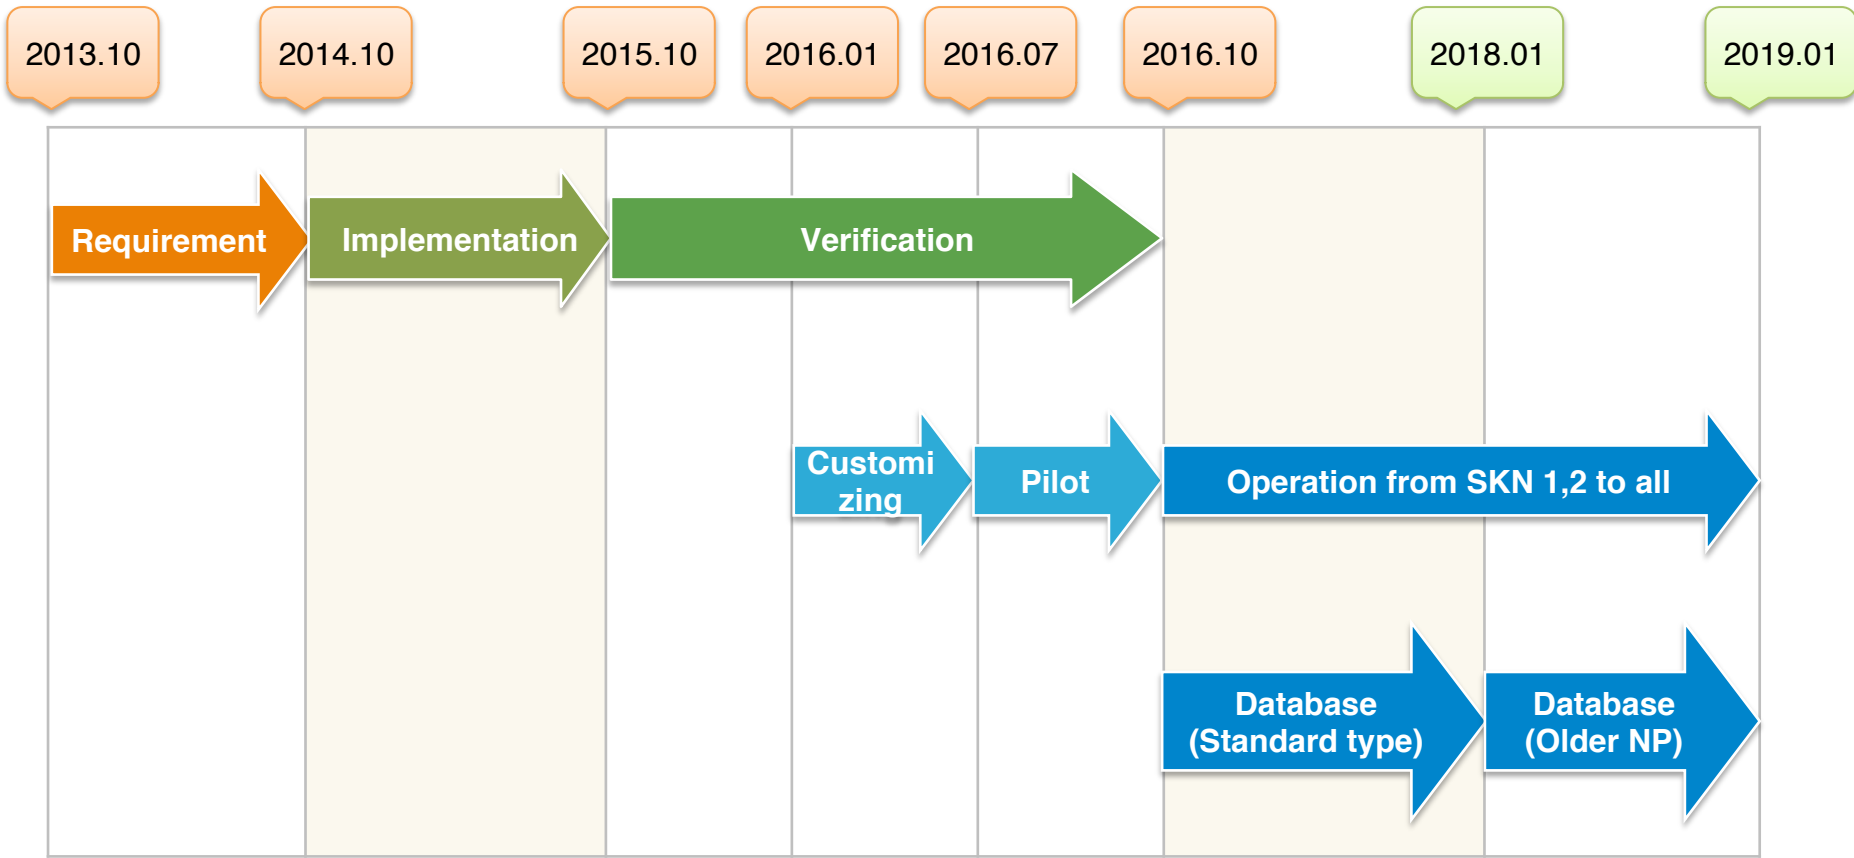

nse
TECHNOLOGY

2. Project Schedule

Development of Configuration Management Platform for Operating NPP

3. Design Principles

**Nuclear Facility
Configuration Management
Survival Guide
Rev 5**

Contents

- Brief History of CM and CMBG
- CM Source Documents
- The 5 Functional Areas of a CM Program
 - CM Visuals
 - CM Lifecycle Diagram
 - Margin Definitions
 - FCI Explanation
 - CM Relationships
- Applying a Graded Approach
- Acronyms and Abbreviations
- Benefits of moving to a Data Centric CM System
- "Buzzword Bible"

CM Visuals
(CM Equilibrium & INPO AP-929)

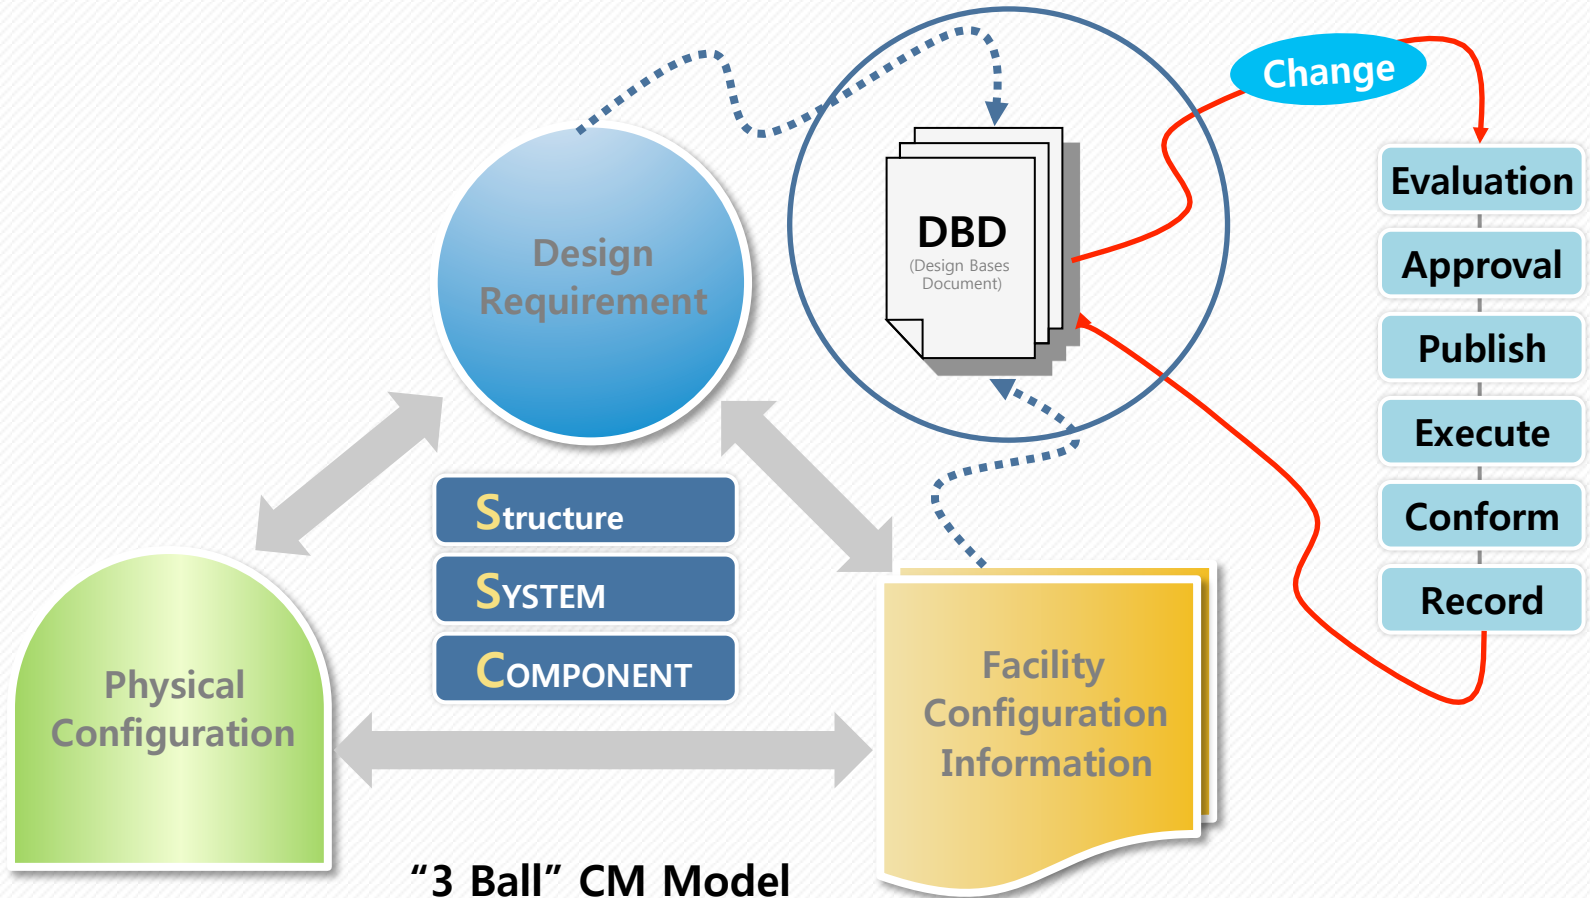

CM Life Cycle Diagram

Margin Definitions

**Benefits of moving to
a Data Centric CM System**

4. Project Goals

❖ CM Equilibrium

(ANSI/NIRMAR, IAEA-TECDOC 1335, INPO 87-006)

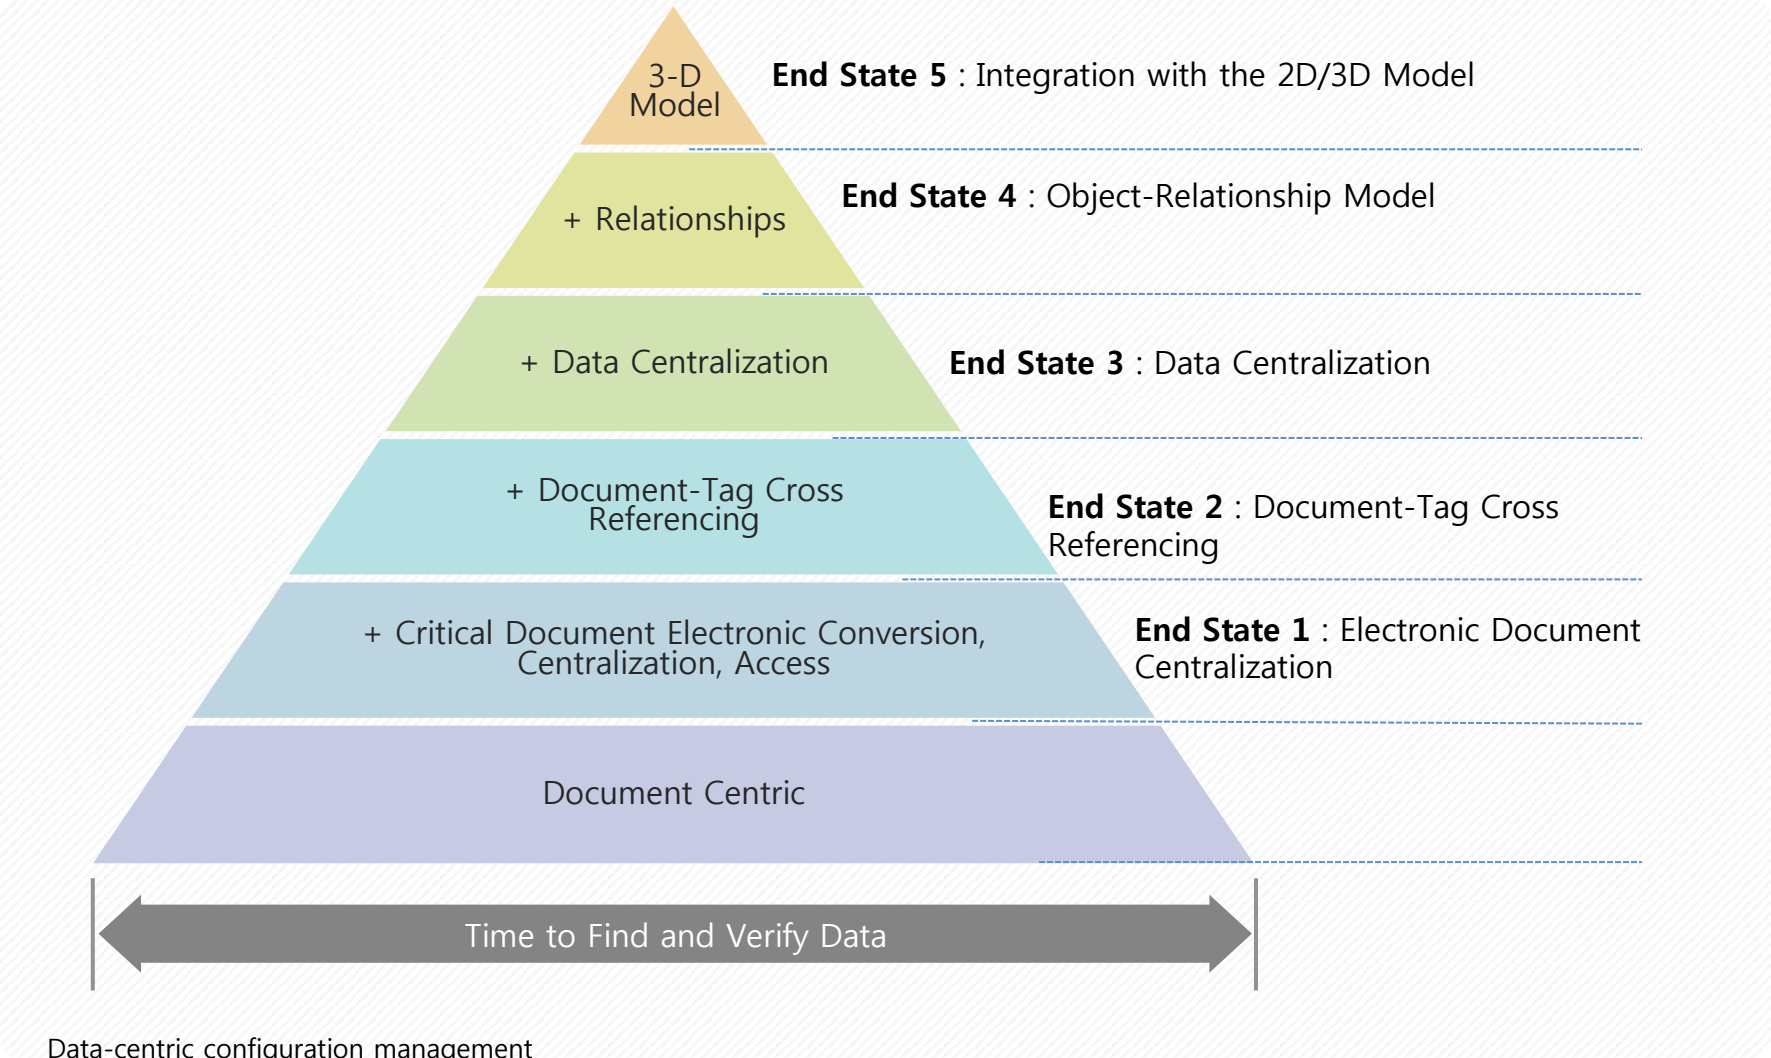

4. Project Goals

❖ Construction vs. Operation

구분	New Built	Operation
Model		
Viewpoint	<ul style="list-style-type: none"> • Making Configuration based on Requirement • Focus on Requirement Management from design requirements to FCI including 3-D model 	<ul style="list-style-type: none"> • Managing Configuration to be equilibrium • Focus on Change management

4. Project Goals

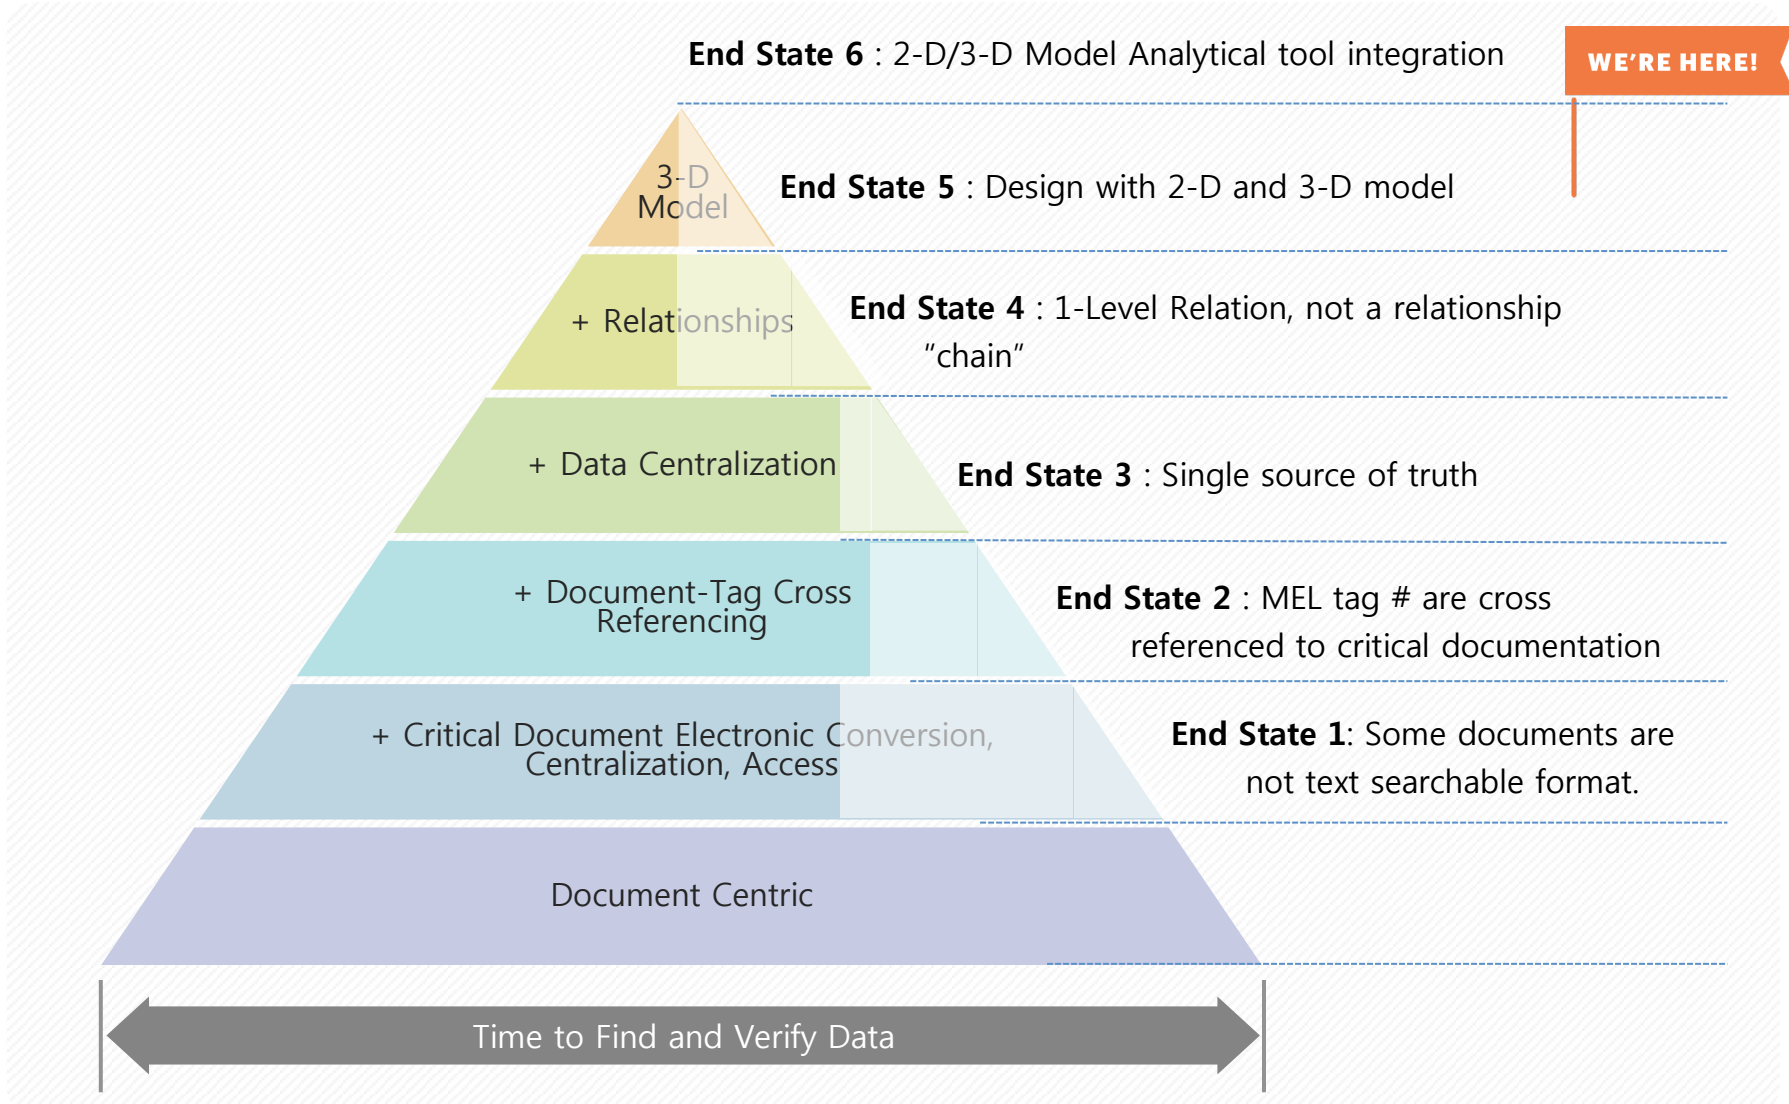

❖ Configuration Management Pyramid

Data-centric configuration management
By Kenneth Barry, Robert Renuart, and Thomas Esselman

5. Where we are

❖ Configuration Management Pyramid

5. Where we are

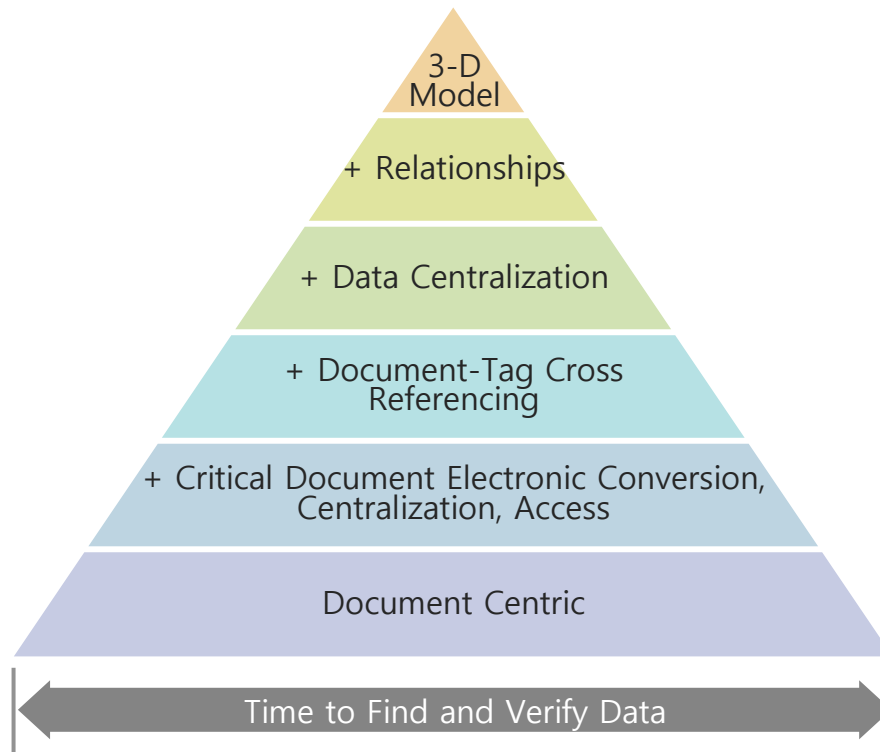

Reactor / Classification		Reactor Type	Capacity	Commercial operation
Kori	#1	PWR	587	78. 4.29
	#2		650	83. 7.25
	#3		950	85. 9.30
	#4		950	86. 4.29
Shin-Kori	#1	APR1400	1,000	11. 2.28
	#2		1,000	12. 7.20
	#3		1,400	16.12.20
Wolsong	#1	PHWR	679	83. 4.22
	#2		700	97. 7. 1
	#3		700	98. 7. 1
	#4		700	99.10. 1
Shin-Wolsong	#1	PWR	1,000	12. 7.31
	#2		1,000	15. 7.24

Reactor / Classification		Reactor Type	Capacity	Commercial operation
Hanbit	#1	PWR	950	86. 8.25
	#2		950	87. 6.10
	#3		1,000	95. 3.31
	#4		1,000	96. 1. 1
	#5		1,000	02. 5.21
	#6		1,000	02.12.24
Hanul	#1	PWR	950	88. 9.10
	#2		950	89. 9.30
	#3		1,000	98. 8.11
	#4		1,000	99.12.31
	#5		1,000	04. 7.29
	#6		1,000	05. 4.22

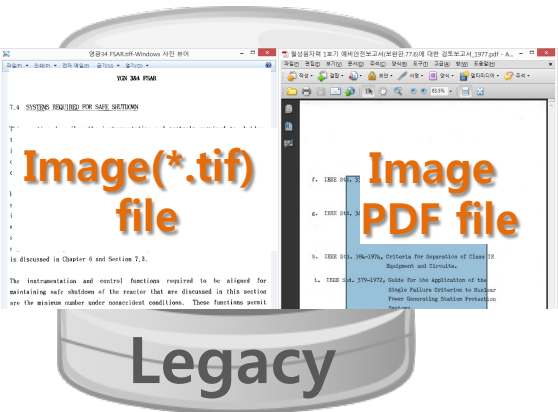

2. Building a CM Pyramid

End State 1: Electronic Document Centralization

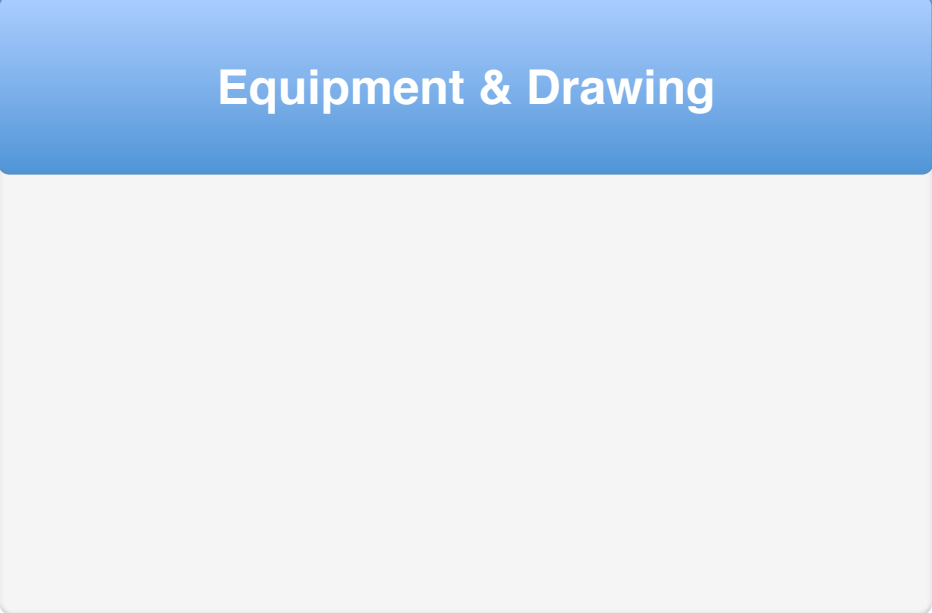

❖ Document Conversion (Text seachable format)

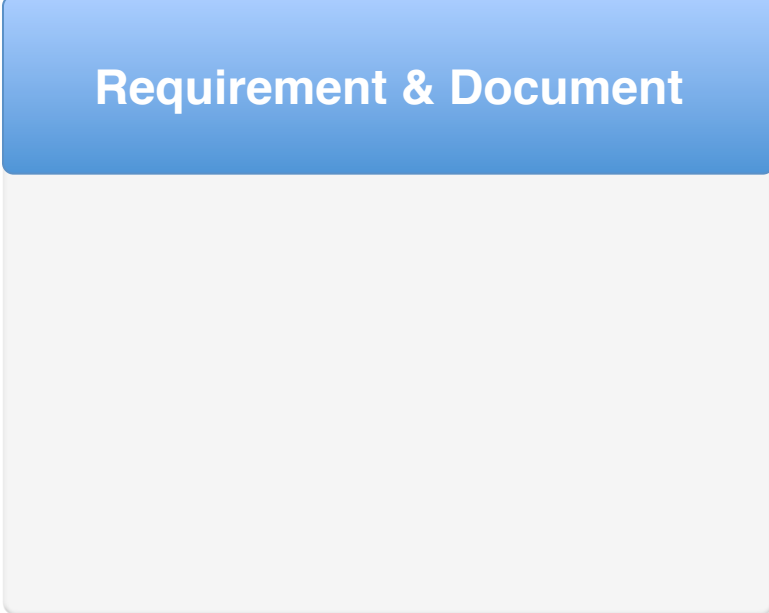

End State 2: Document-Tag Cross Referencing

❖ **Cross referencing**

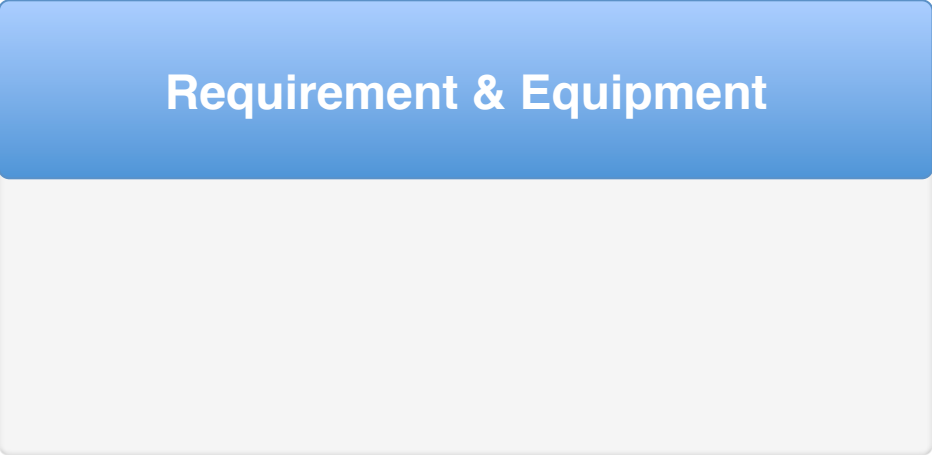

Equipment & Drawing

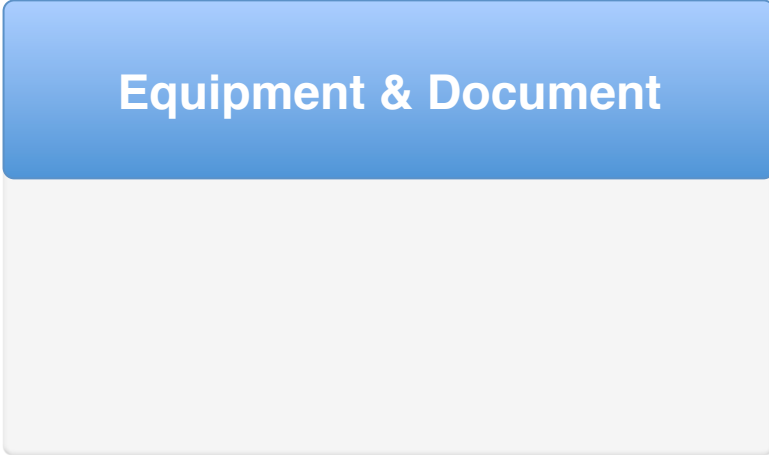

Requirement & Document

Requirement & Equipment

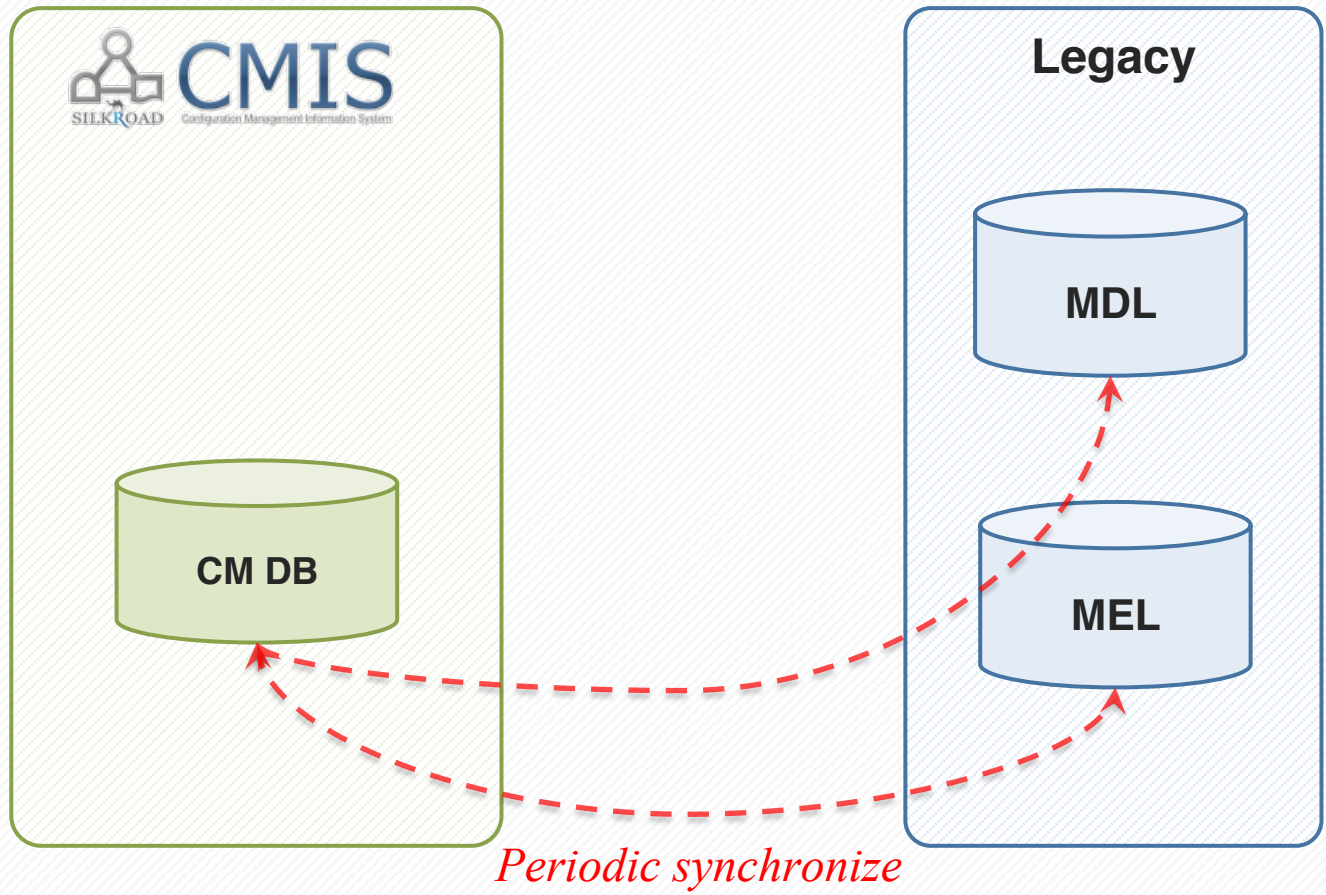

Equipment & Document

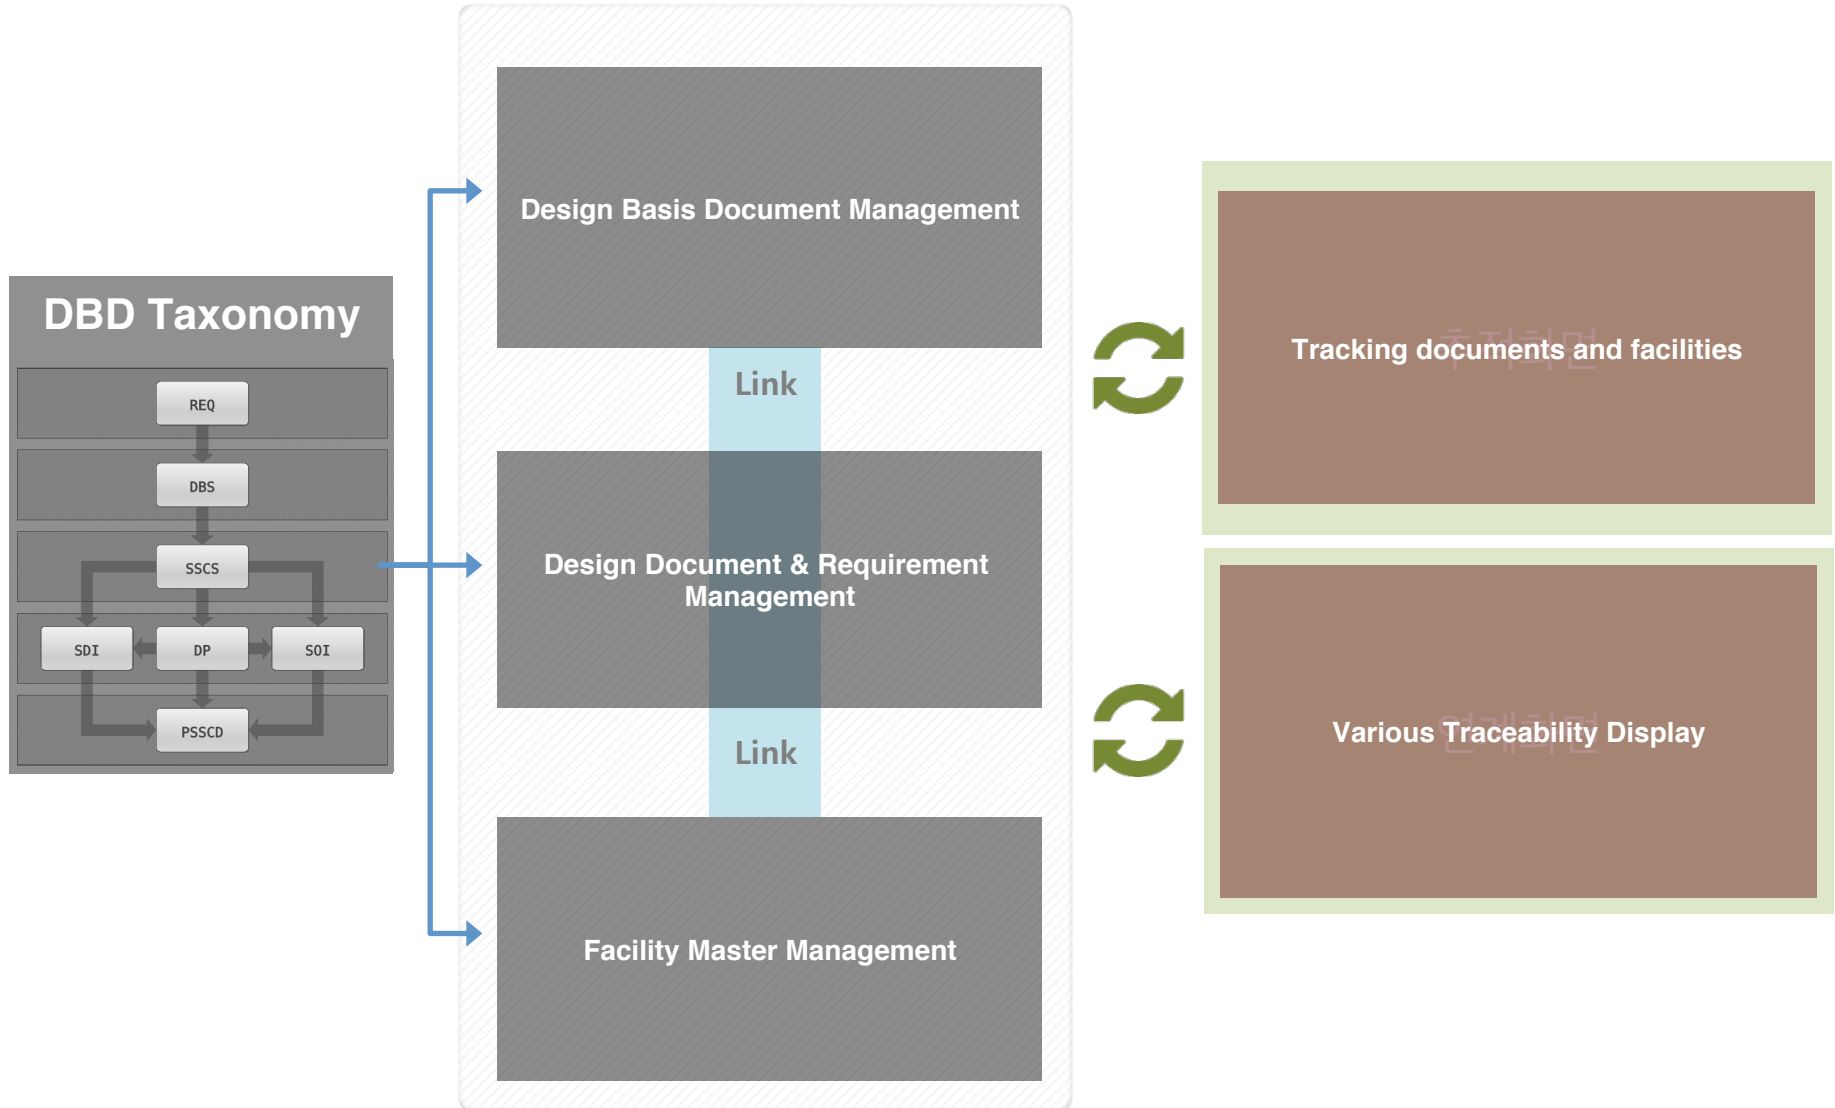

End State 3: Single source of truth

❖ Single database

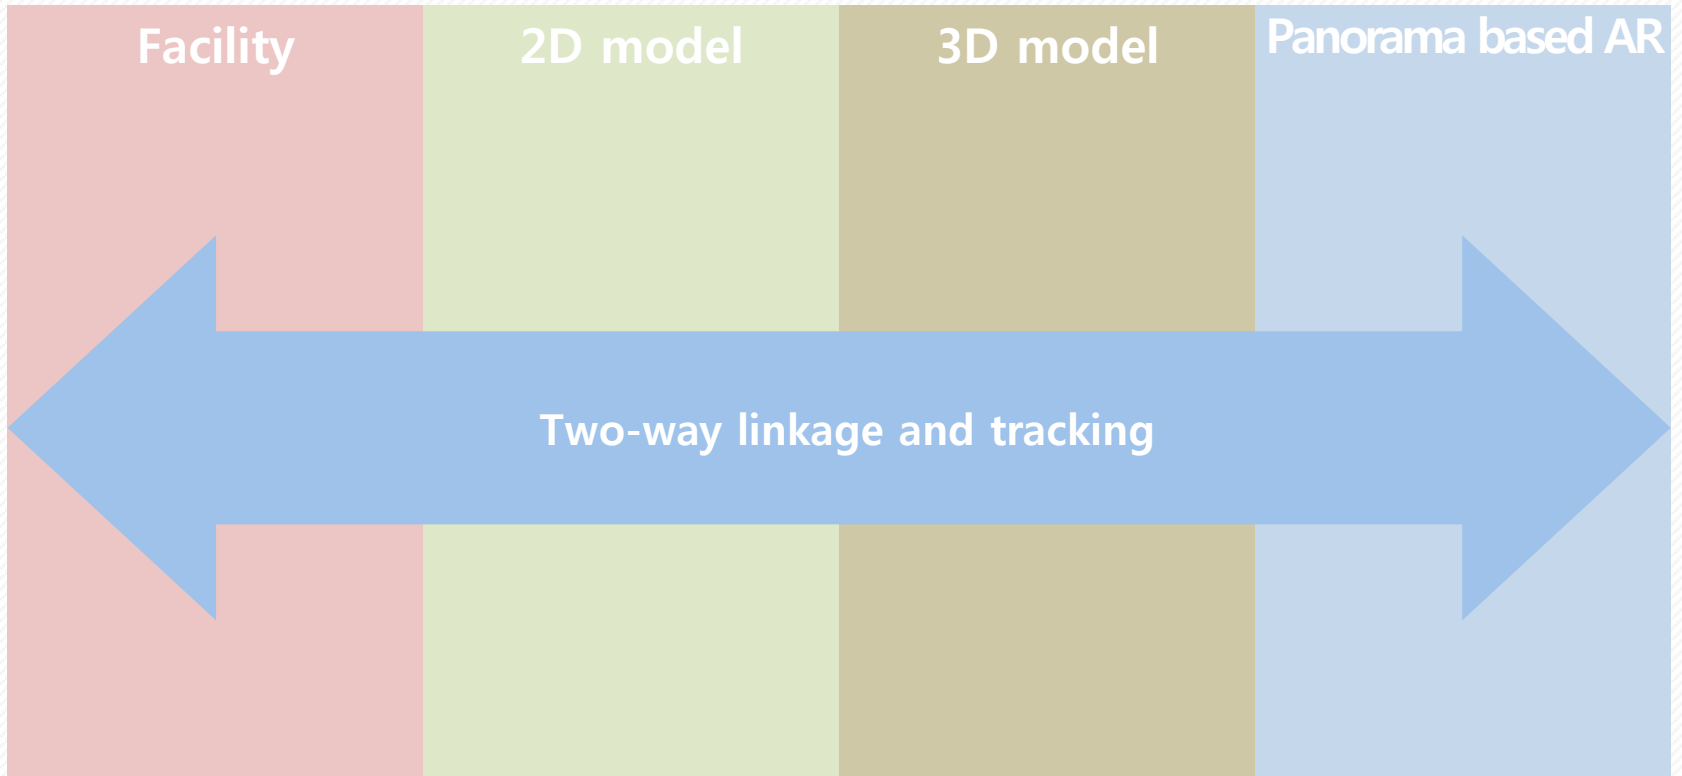

End State 4: Object-Relationship Model

❖ Relationship “chain”

End State 5: Integration with the 2D/3D Model

❖ Integration Facility, 2D model, 3D model and Panorama

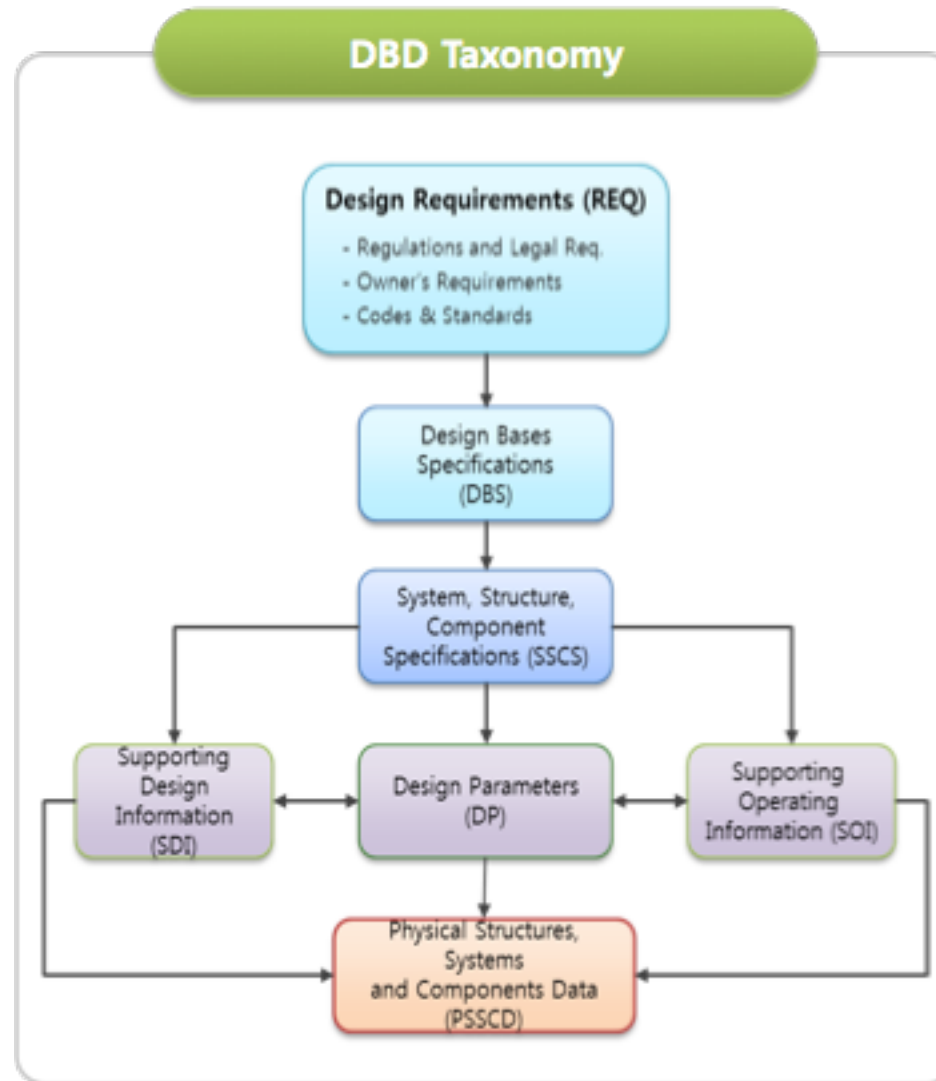

3. Design Requirement Management

- ❖ **What is the best DBD(Design Bases Document) taxonomy for us?**
- ❖ **Can utility person make the DBD for old NPP themselves?**
Could we request the original EPC to make the DBD for old NPP?
- ❖ **Can we have EPRI PIM views for impact analysis?**

1. DBD Taxonomy

❖ DBD Taxonomy

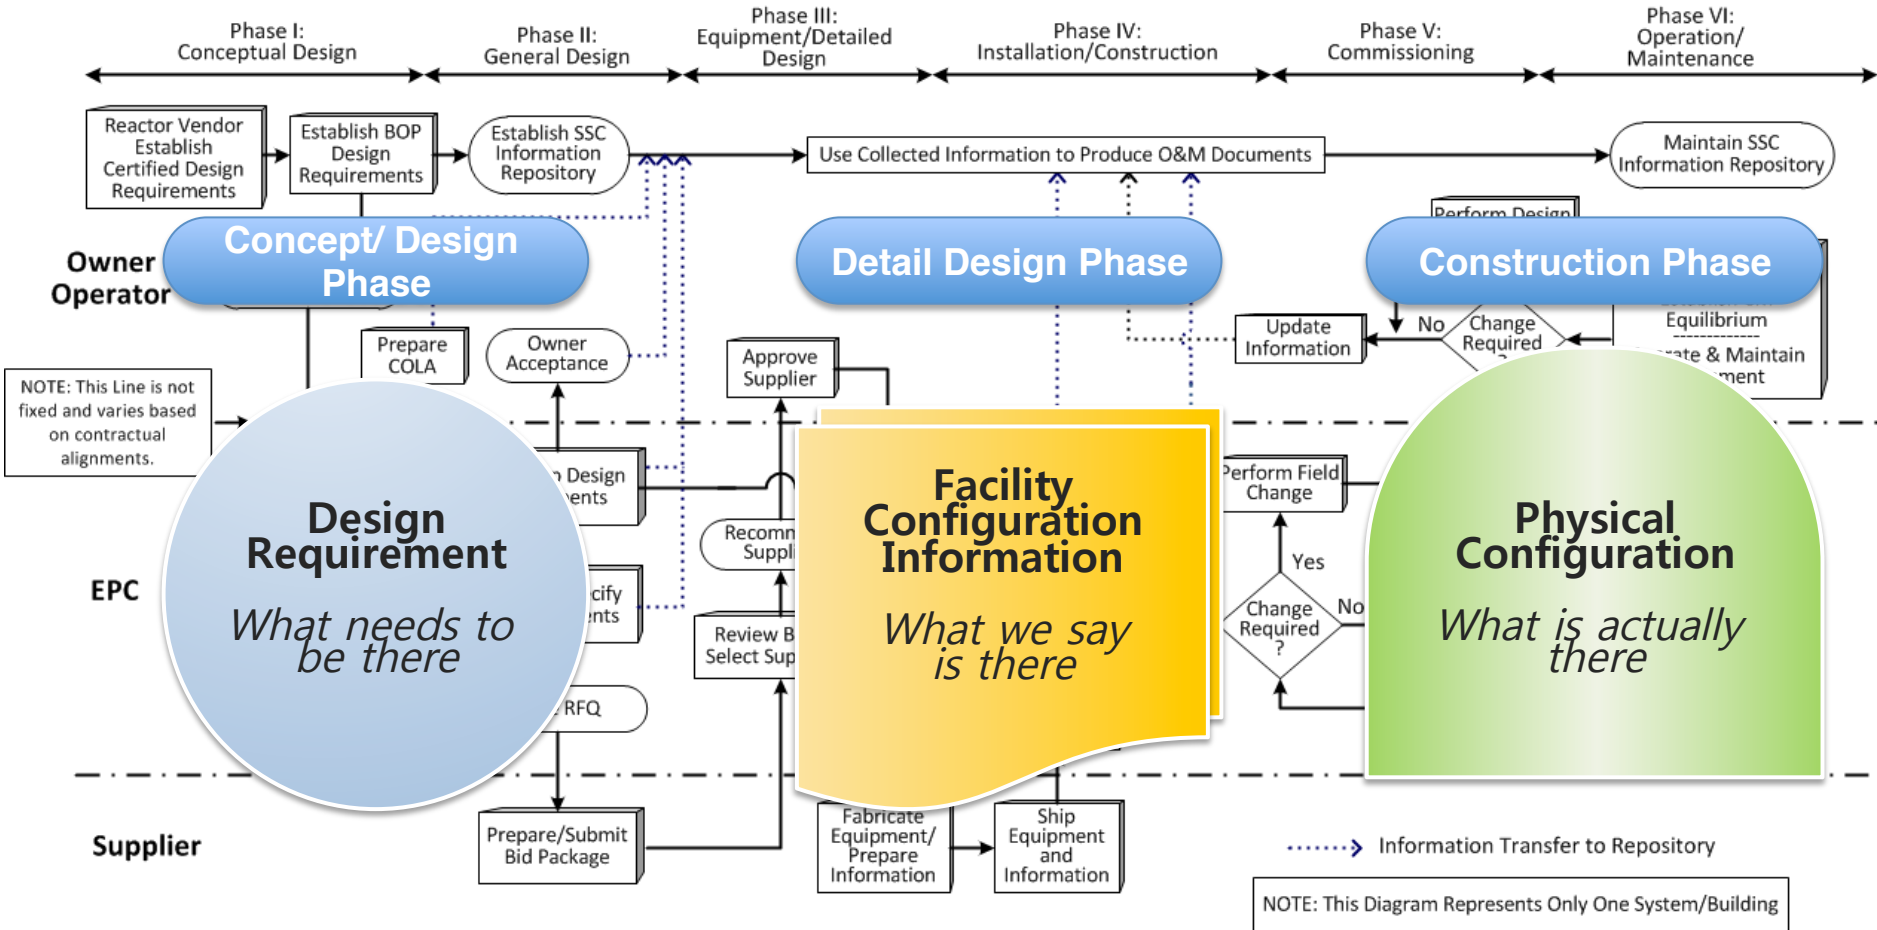

2. Design Bases Document

❖ How long / How much ?

2. Design Bases Document

❖ CM Lifecycle Diagram

2. Design Based Document

❖ Terminology

U-DBD	Unit Requirement Based DBD
F-DBD	File Based DBD
H-DBD	Hybrid Based DBD

3. Impact Analysis

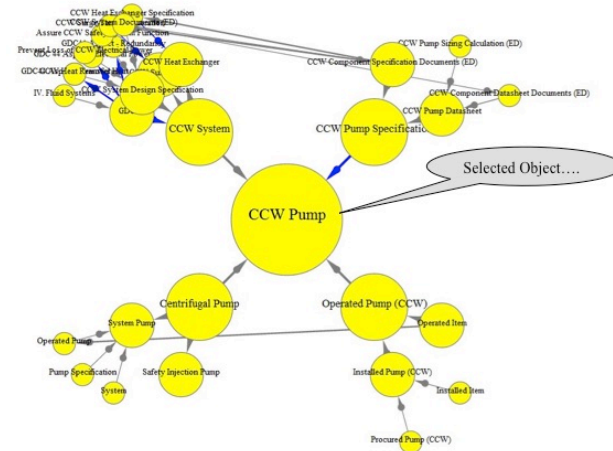

❖ EPRI PIM (2012 CMBG - EPRI PIM Workshop)

PIM View - Dynamic Reports

CCW Pump	A pump allocated to Component Cooling Water (CCW) System
Centrifugal Pump	A dynamic pump utilizing impellers provided with vanes generating centrifugal force to achieve the required pressure head
CCW System	Component Cooling Water System
GDC 44	Criterion 44—Cooling water. A system to transfer heat from structures, systems, and components important to safety, to an ultimate heat sink shall be provided. The system safety function shall be to transfer the combined heat load of these structures, systems, and components under normal operating and accident conditions. Suitable redundancy in components and features, and suitable interconnections, leak detection, and isolation capabilities shall be provided to assure that for onsite electric power system operation (assuming offsite power is not available) and for offsite electric power system operation (assuming onsite power is not available) the system safety function can be accomplished, assuming a single failure.
IV, Fluid Systems	Part of Criteria section of Appendix A to Part 50—General Design Criteria for Nuclear Power Plants
Appendix A to Part 50	General Design Criteria for Nuclear Power Plants
10 CFR Part 50	Title 10, Code of Federal Regulations PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES
NRC Regulations	TBD
Requirements Management	TBD
NNPP-PIM	!!!PLEASE NOTE - THIS IS WORK IN PROGRESS!!! New Nuclear Power Plant Information Model
CCW System Design Specification	The component cooling water system (CCW) is provided to transfer heat from plant safety-related components to the UHS. This system is designed to transfer the heat loads under all anticipated normal and accident conditions.
CCW Heat Removal	
CCW Design Requirements	
Design and Licensing Basis Requirements	
Requirements Management	TBD
NNPP-PIM	!!!PLEASE NOTE - THIS IS WORK IN PROGRESS!!! New Nuclear Power Plant Information Model
GDC44 Aspect - Transfer Heat	
GDC 44	Criterion 44—Cooling water. A system to transfer heat from structures, systems, and components important to safety, to an ultimate heat sink shall be provided. The system safety function shall be to transfer the combined heat load of these structures, systems, and components under normal operating and accident conditions. Suitable redundancy in components and features, and suitable interconnections, leak detection, and isolation capabilities shall be provided to assure that for onsite electric power system operation (assuming offsite power is not available) and for offsite electric power system operation (assuming onsite power is not available) the system safety function can be accomplished, assuming a single failure.
IV, Fluid Systems	Part of Criteria section of Appendix A to Part 50—General Design Criteria for Nuclear Power Plants
Appendix A to Part 50	General Design Criteria for Nuclear Power Plants
10 CFR Part 50	Title 10, Code of Federal Regulations PART 50—DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES
NRC Regulations	TBD
Requirements Management	TBD
NNPP-PIM	!!!PLEASE NOTE - THIS IS WORK IN PROGRESS!!! New Nuclear Power Plant Information Model
Prevent Loss of CCW Electrical Power

4. Facility Configuration Information Management

- ❖ Can we manage both MDL and MEL in one system?
- ❖ Can we handle simultaneous design change requests in an equipment?
- ❖ Can we look up all kind of data within the system?
- ❖ How to manage Margins ?

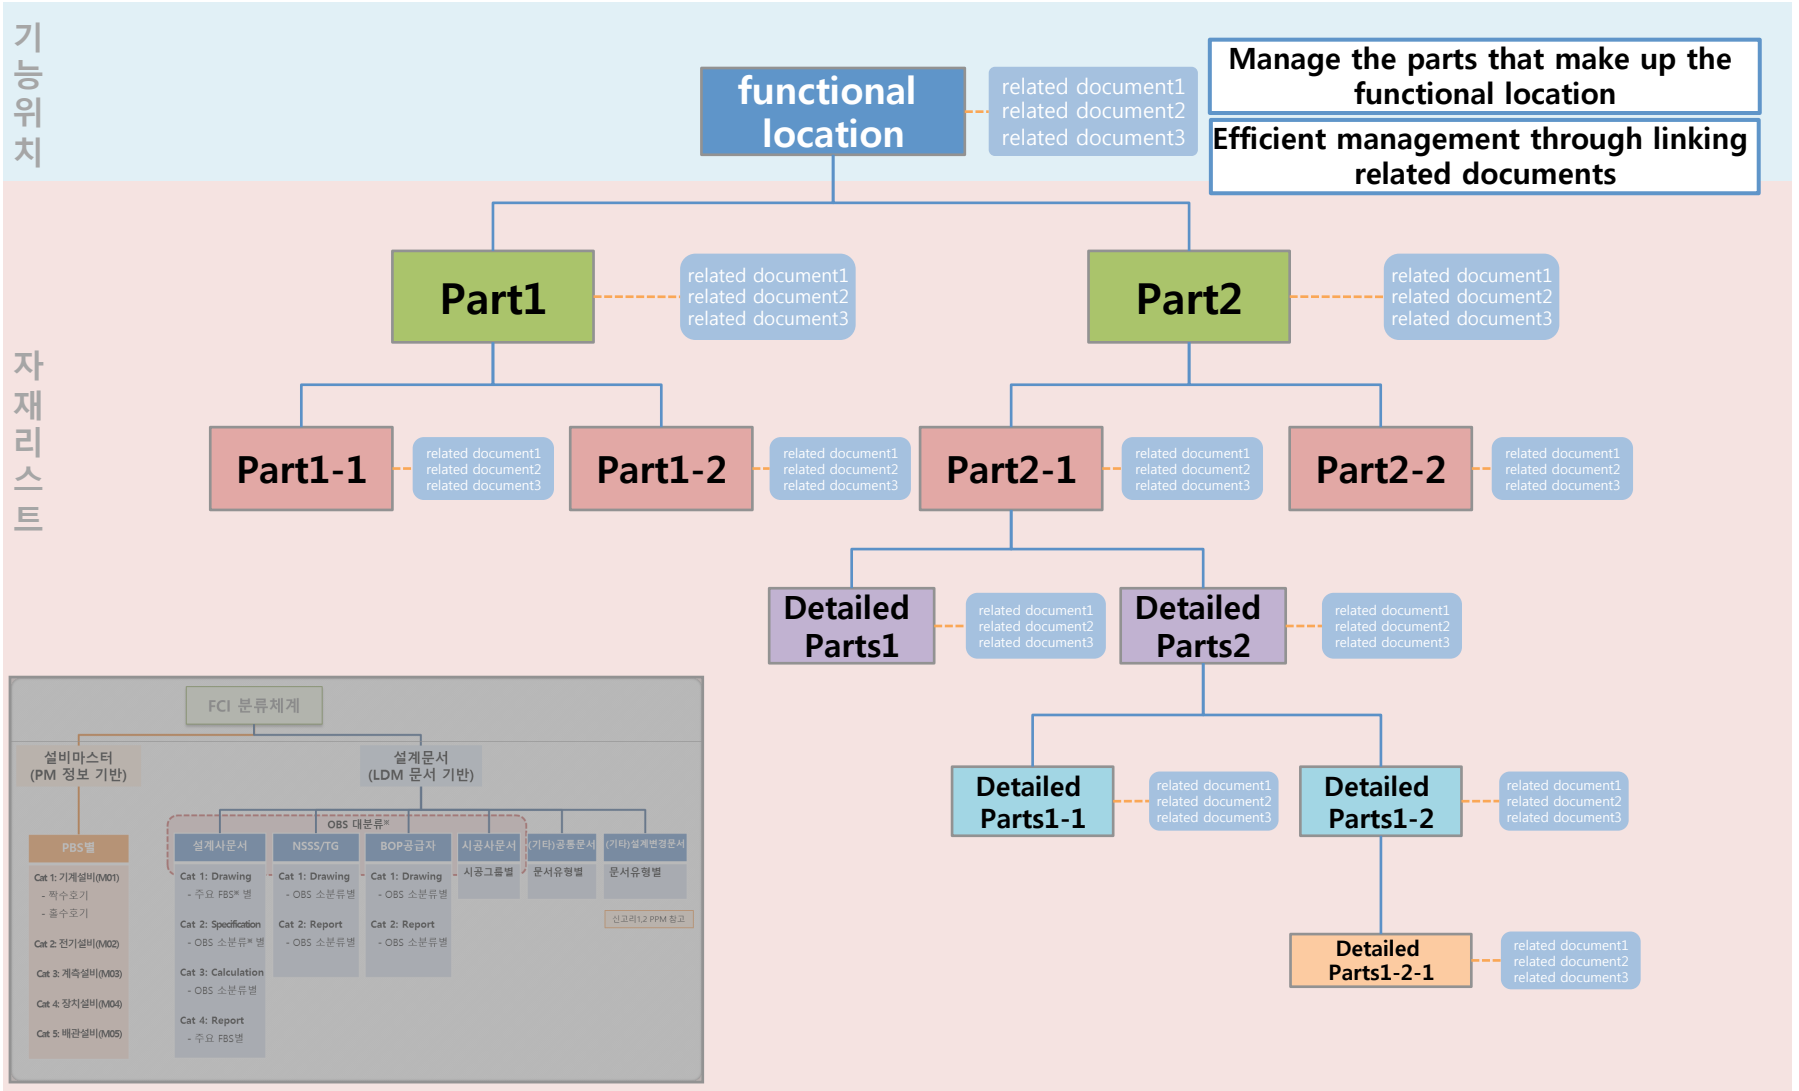

1. Single Database

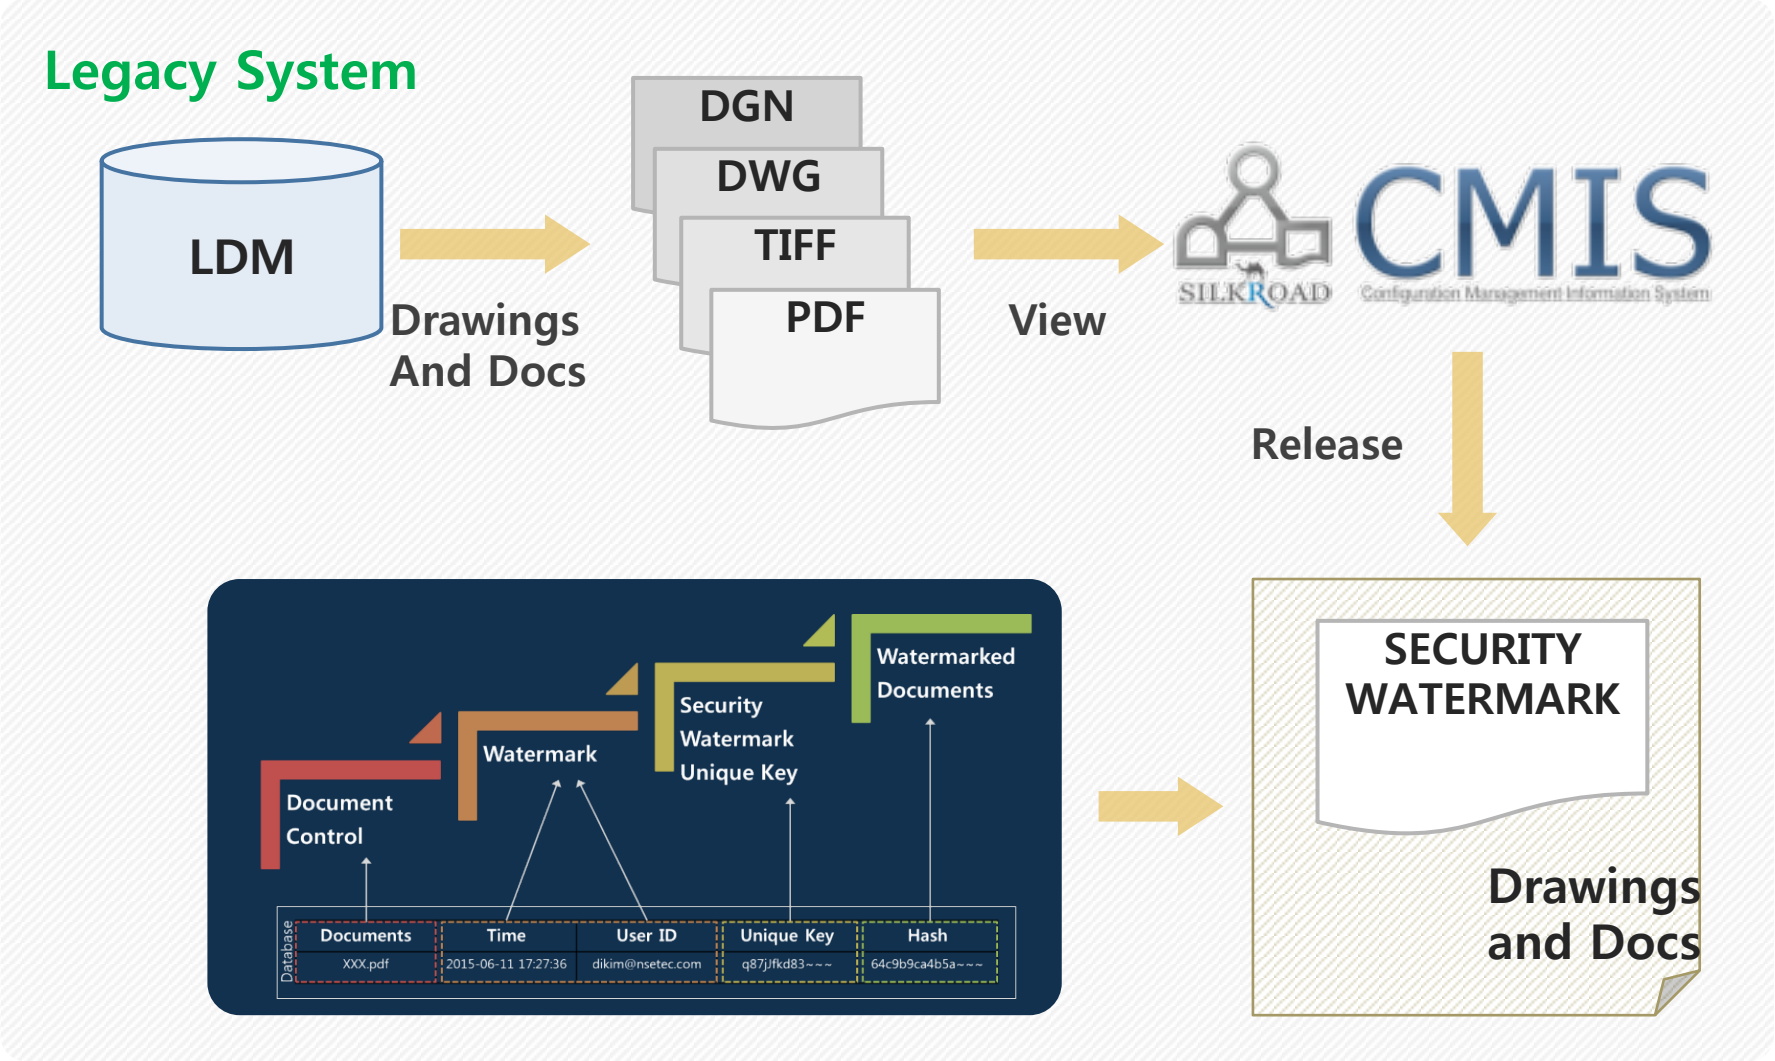

❖ BOM

기능위치

자재리스트

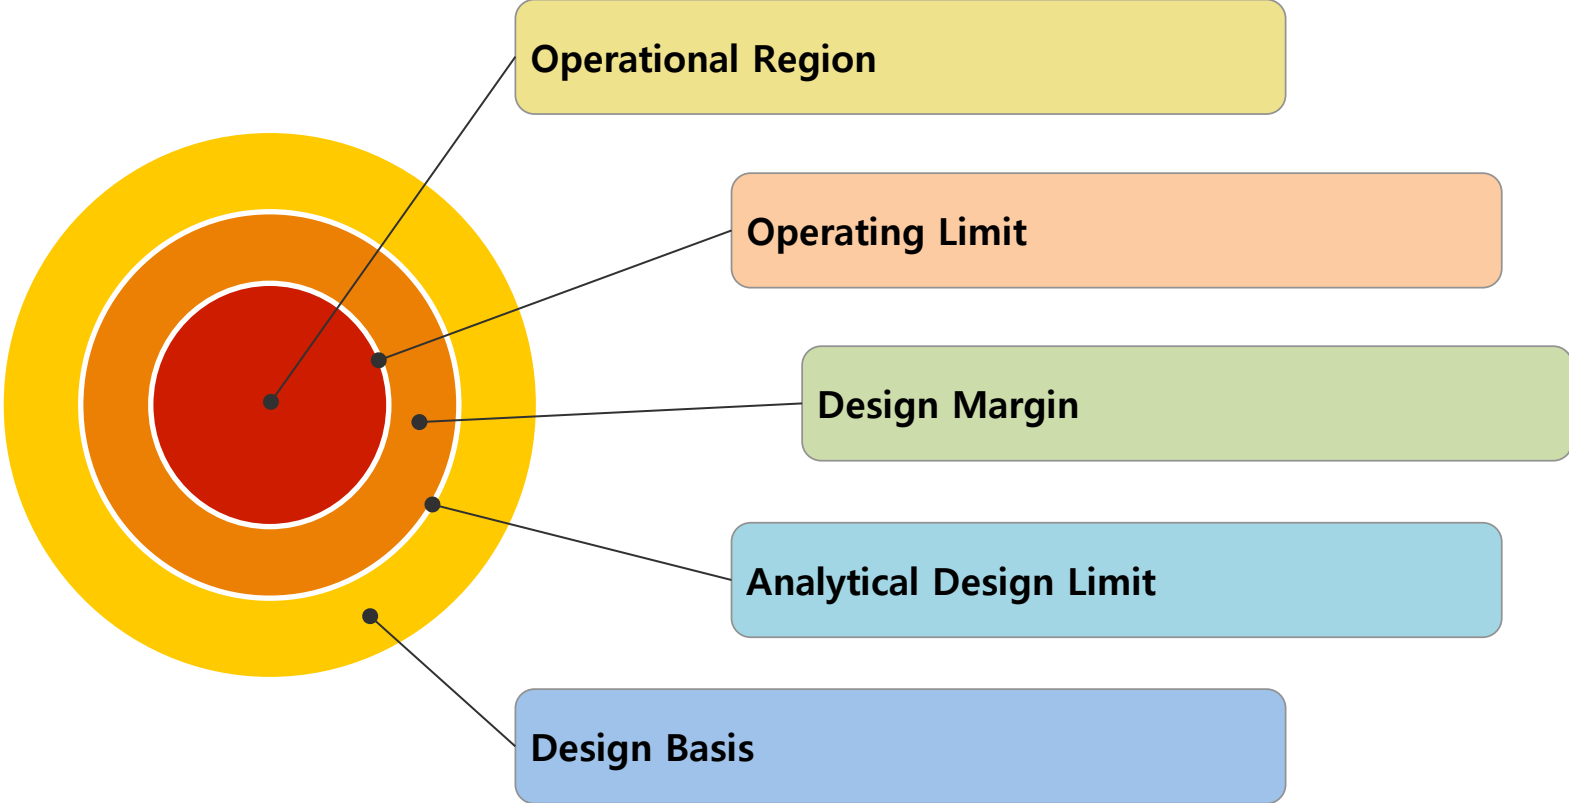

3. Single viewer for various format

4. Margin Management

❖ Margin Configuration Management

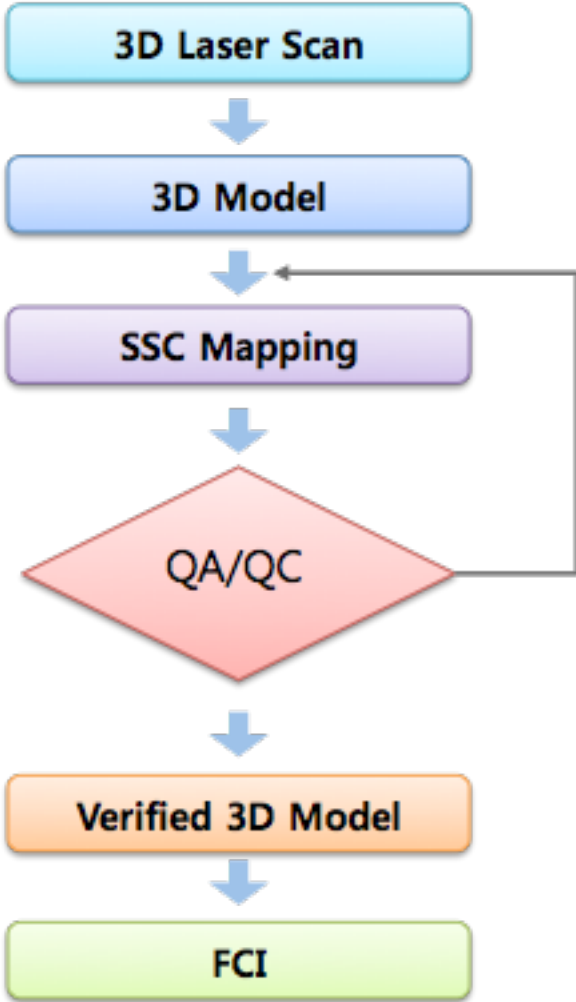

5. Physical Configuration Management

- ❖ What is the physical configuration in a SW system ?

1. Physical CM of Operating NPP

❖ Reverse engineering with 3D Laser Scan

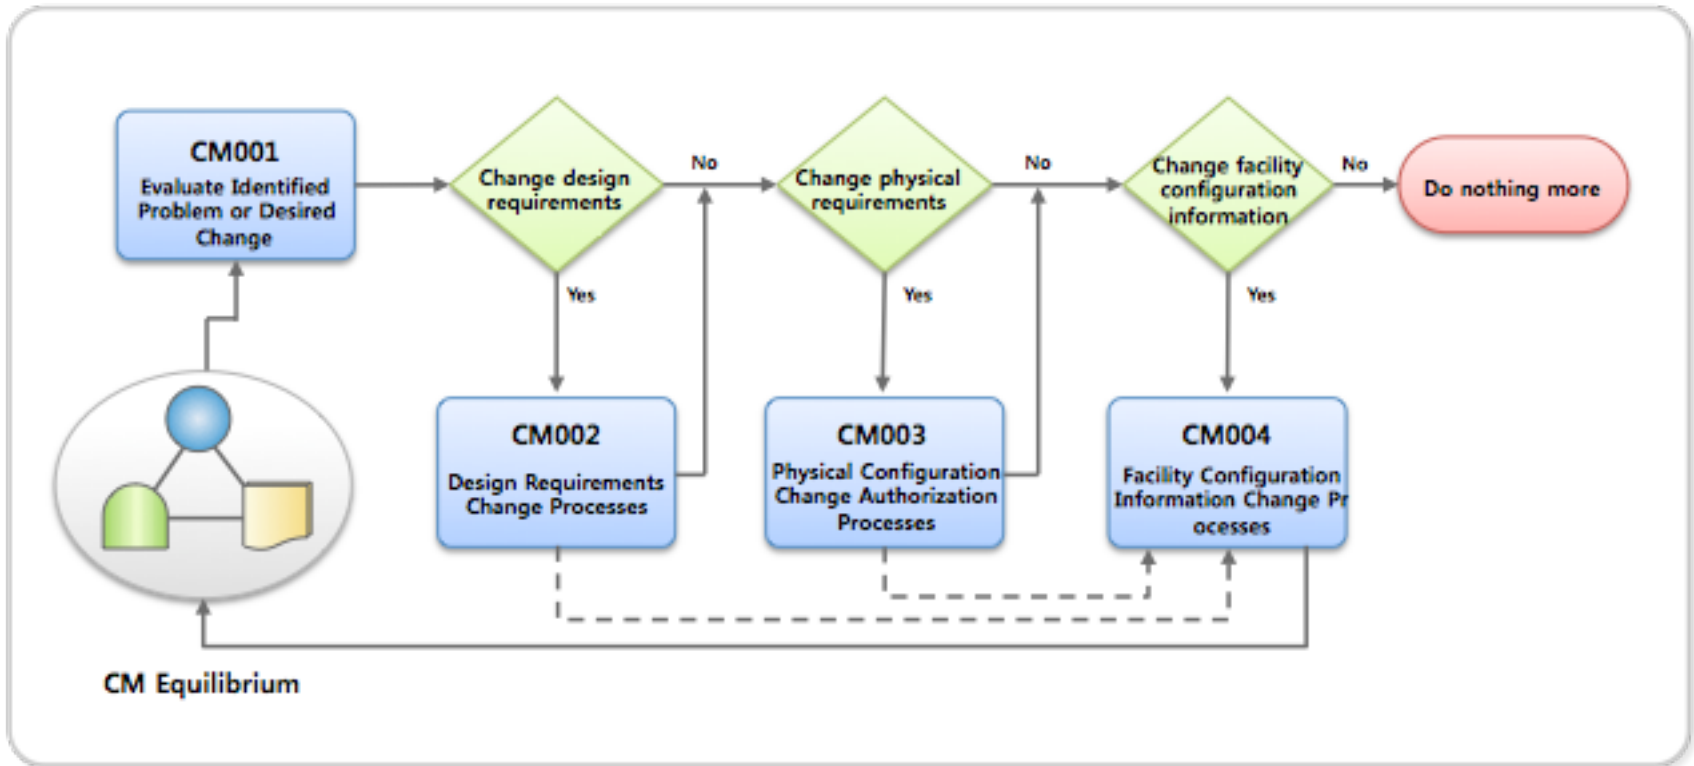

6. Change Management

- ❖ **Is the change process of KHNP followed by AP-929?**
- ❖ **Can we have paperless working environment ?**
- ❖ **Can we monitor the process ?**
- ❖ **Can we do design change review ?**
- ❖ **How can the system help for seamless process ?**

1. Standard Design Change Process

❖ INPO AP-929
