

Config Control Issues

- legacy digital system config
- threshold for mod reqs vs other changes
- Setpoint changes / minor mods or SW-only change
- Firmware version control
 - Via model number suffix
 - version controlled or no?
 - JEC for eval of FW change
- via V&V
 - cyber documentation / Acting
 - which org controls (cyber, IT, design)
- Vendor may not know / share FW vcs

• CB diff for action

Evaluating digital content

- review Spec sheets (design)
- PEG review
- Continuous training
- Buzz words & key systems/components guidance
- Procurement T-Note

Software Config Control (Settings)

- 'Special' drawing
- Case-by-case for each project
- COTS Config file module

Tunable/Critical Values

- listed w/ drawing
- Audit of settings at testing phase
